

The all new SenSura Mio. Available from January 1st 2015

Dear Healthcare Professional,

The all new SenSura Mio. Available from January 1st 2015

Your patient has requested a sample of the new SenSura Mio from Coloplast, and following a successful experience, **they would like to change their prescription**. We are committed to improving patient outcomes and helping you manage costs, and we would like to take this opportunity to keep you informed of the benefits of SenSura Mio, so that you too are comfortable with their request to change their appliance.

The elastic adhesive fits every body shape

Fits securely

The elastic adhesive adapts to body contours and creates a secure fit over hernias, scarring and skin folds.

Follows natural body movements

The elastic adhesive stretches with the skin when the abdominal shape change and when the body bends and stretches

Designed to stay unnoticed

Full-circle filter

The unique pre-filter reduces clogging and provides long-term protection against ballooning.

Neutral grey-coloured textile

The neutral grey, all-textile material is designed to stay unnoticed under all clothing colours – even under white.

Meeting your needs as a prescriber

With all this innovation you might have expected a high price. However, we recognise that the NHS agenda focuses on improving quality and optimising spending. The great news is all these benefits come at the same cost as our standard SenSura range.

We are also able to offer your patient the support of our Coloplast Care Stoma Nursing Service, who work in collaboration with other NHS professionals to ensure patients get access to the best ongoing package of care for those with a stoma.

Thank you

If you should have any questions, please call our Customer Care team on **0800 374 654** and we will be more than happy to assist.

Kind regards,

Coloplast

The all new SenSura Mio. Available from January 1st 2015
